

Lap Band Reasons

Lap Band Reasons

As Cherie says, she had lap band surgery for her younger son (13), believing it was time to take action to lose some weight.

Like many individuals, Cherie would try out a weight loss program, lose the weight and gain it right back, sometimes doubling the weight. With the weight increasing, it led her to try lap band surgery, a decision she now notes was much to her benefit.

With the Lap Band surgery behind her, Cherie says she can now wear clothing that at one time was too small for her.
